

## Tree Removals

The table below lists the details of the trees to be removed, including tree location, tree species and condition assessment. For further location details, please refer to the street map outlining all removals, replacements and infill planting. Alternatively, each tree has had a reference tag attached and these tags will correspond to the reference number below for on-site identification.

Ref No.	Street Address	Assessment Outcome	Follow Up Action	Current Tree Species	Tree Condition Assessment (*Useful Life Expectancy <2 Years)	Tree Image
2	21 Browning Drive	Tree to be removed	No replacement tree to be planted	<i>Liquidamber styraciflua</i>	Useful Life Expectancy <2 Years	
3	31 Browning Drive	Tree to be removed	Replacement tree to be planted	<i>Prunus serrulata</i>	Useful Life Expectancy <2 Years	

## Infill Planting Locations

The table below lists the details of the locations where trees will be planted in currently vacant sites along Browning Drive, Glen Waverley. For further location details, please refer to the street map outlining all removals, replacements and infill planting.

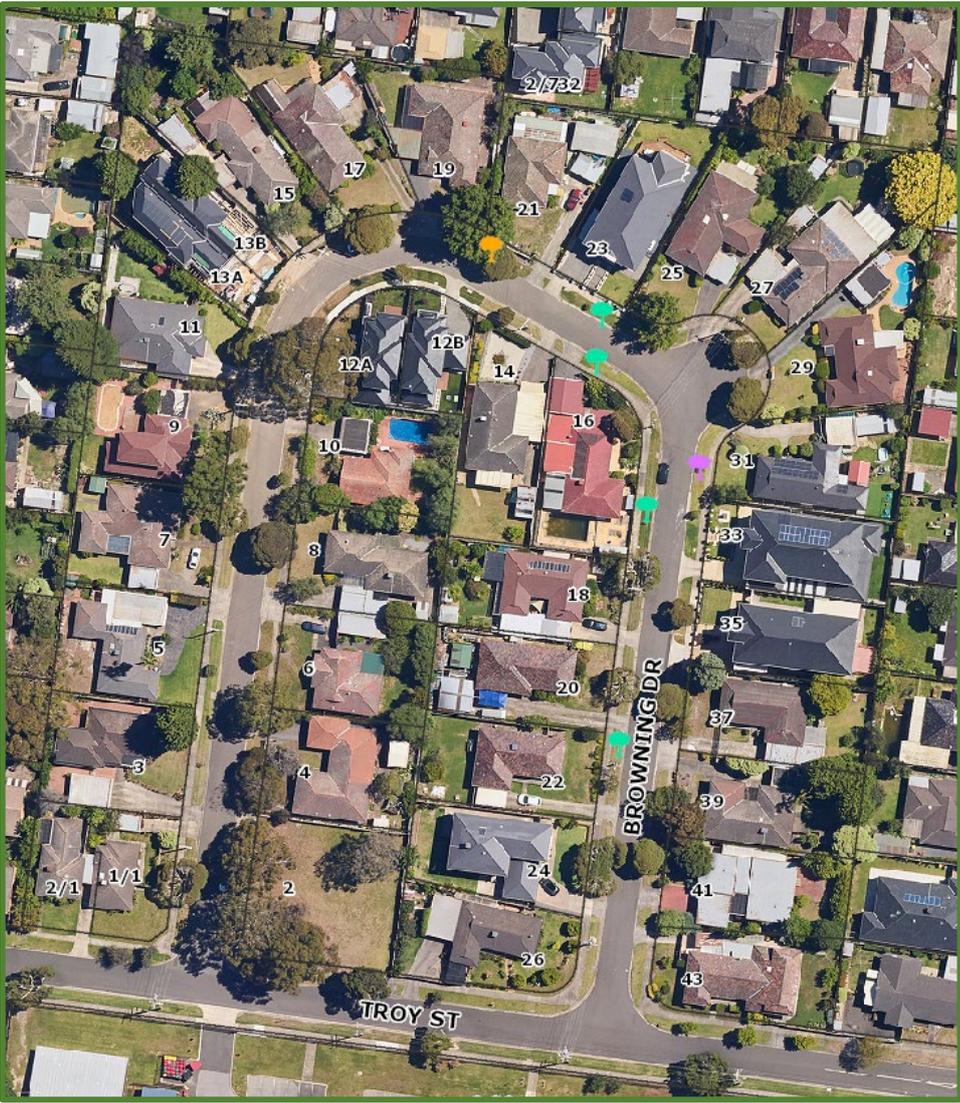

No.	Street Address	Assessment Outcome	Follow Up Action
1	16 Browning Drive	Vacant Site	New tree to be planted
2	16 Browning Drive	Vacant Site	New tree to be planted
3	22 Browning Drive	Vacant Site	New tree to be planted
4	23 Browning Drive	Vacant Site	New tree to be planted

# Street Overview

The map below details the removals, replacements and infill plantings. All other trees have been assessed as having more than two years' useful life and will be retained.

## Street Overview Legend

-  Tree to be Removed and Replaced
-  New Tree
-  Tree Removed with No Replacement

## Proposed Tree Species Options

Council’s Street Tree Strategy team has created three (3) options to choose from using the most appropriate species for the location.

### Option 1 – Single species (both sides of the road)

<i>Tristaniopsis laurina</i> ‘Luscious’ (Luscious Kanooka)	
	<p>An Australian native. Leaves are dark green, shiny and large. New growth starts in a distinctive copper colour and further interest appears over time with the branches developing deep purple coloured bark which peels back to reveal a smooth, cream trunk. Flowers are yellow and sweetly perfumed, appearing in clusters through summer.</p>
	<p><b>Mature Size</b></p> <p><b>Height x Width (m):</b>      8m x 4m</p> <p><b>Form:</b>                              Oval</p>
	

**Option 2 – Single species (both sides of the road)**

***Lagerstroemia indica x L. fauriei 'Natchez' (Natchez Crepe Myrtle)***

This small deciduous tree that has white flowers borne in clusters from late summer to early autumns. It has a beautiful growth habit with dark green leaves changing to orange before falling. It has flaking bark with a rich brown under bark.

**Mature Size**

**Height x Width (m):** 8m x 6m

**Form:** V-Shaped

**Option 3 – Single species (both sides of the road)**

<b>Eucalyptus pauciflora 'Little Snowman' (Dwarf Snow Gum)</b>	
	<p>A small, evergreen, open canopy tree which has white blooms appearing in spring through to summer. The bark of this tree is smooth and streaked grey, brown or golden-tan over a cream under bark.</p>
	<p><b>Mature Size</b></p> <p><b>Height x Width (m):</b>      4-7m x 3-6m</p> <p><b>Form:</b>                              Round</p>
