

Tree Removals

The table below lists the details of the trees to be removed, including tree location, tree species and condition assessment. For further location details, please refer to the street map outlining all removals, replacements and infill planting. Alternatively, each tree has had a reference tag attached and these tags will correspond to the reference number below for on-site identification.

Ref No.	Street Address	Assessment Outcome	Follow Up Action	Current Tree Species	Tree Condition Assessment (*ULE <2 Years)	Tree Image
19	2 Cambrian Crescent (in Winterton Drive)	Tree to be removed	Replacement tree to be planted	<i>Grevillea robusta</i>	Dieback to 40% of crown & poor form.	

Infill Planting Location

The table below lists the details of the locations where trees will be planted in currently vacant sites along Winterton Drive, Wheelers Hill For further location details, please refer to the street map outlining all removals, replacements and infill planting.

No.	Street Address	Assessment Outcome	Follow Up Action
1	1 Winterton Drive	Vacant Site	New tree to be planted
2	5 Winterton Drive	Vacant Site	New tree to be planted
3	5 Winterton Drive	Vacant Site	New tree to be planted
4	7 Winterton Drive	Vacant Site	New tree to be planted
5	13 Winterton Drive	Vacant Site	New tree to be planted
6	18 Winterton Drive	Vacant Site	New tree to be planted
7	19 Winterton Drive	Vacant Site	New tree to be planted
8	938 Waverley Road	Vacant Site	New tree to be planted
9	938 Waverley Road	Vacant Site	New tree to be planted

Proposed Tree Species Options

Council’s Street Tree Strategy team has created three (3) options to choose from using the most appropriate species for the location.

Option 1 – Combination of species

<i>Tristaniopsis laurina</i> ‘Luscious’ (<i>Luscious Kanooka</i>)	
	<p>An Australian native. Leaves are dark green, shiny and large. New growth starts in a distinctive copper colour and further interest appears over time with the branches developing deep purple coloured bark which peels back to reveal a smooth, cream trunk. Flowers are yellow and sweetly perfumed, appearing in clusters through summer.</p>
 	<p>Mature Size</p> <p>Height x Width (m): 8m x 4 m</p> <p>Form: Oval</p>

<i>Lophostemon confertus</i> (<i>Queensland Brush Box</i>)	
	<p>This is a fast-growing tree. Dome-like in shape, it develops a very dense foliage cover of dark green, leathery leaves providing good shade for the summer months. Summer also brings clusters of small white flowers whose stamens give them a decorative fluffy appearance.</p>
	<p>Mature Size</p> <p>Height x Width (m): 10m x 15m</p> <p>Form: Oval</p>

Option 2 – Single species (both sides of the road)

<i>Callistemon viminalis</i> (Dawson's River)	
 	<p>This is a pretty bird-attracting tree with a heavy crown due to the profusion of brilliant red flowers in spring and summer. It is the weight of these flowers that gives it a pendulous habit.</p>
<p>Mature Size</p>	
Height x Width (m):	6-8m x 6-8m
Form:	Round

Option 3 – Single species (both sides of the road)

***Corymbia eximia* 'Nana' (Dwarf Yellow Bloodwood)**

The foliage is broad with a strong green colour and may turn a paler yellow/green in the colder months. In spring the tree puts on an eye-catching display covering itself in creamy yellow flowers, attracting nectar-loving birds.

Mature Size	
Height x Width (m):	6-8m x 4-6m
Form:	Round
